DO WE WANT TIN WORKS? Now that we have splendld manufacturing sites and two railroads in Keyser Valley, there is a strong desire among West Side people to have the new tin plate works located there. That region has been considered by those who are interested in the new works and onsiderable favor is shown by the proectors toward that section. Keyser Valley certainly has many advantages or industries, and if the West Side and subscribe for a fair share of the stock this industry can be secured. What a boom it would be for the West Side! Four hundred hands would be employed and the monthly pay-roll would be about twenty thousand dot-lars. The establishment of such an industry in Keyser Valley would soon bring other industries there, because the decided advantages of that terriversary in Evans' hall, South Main tory for industries would be disclosed. The tin industry is a yielder of large profits to the stockholders, the lowest returns ever known since its establishment in the United States being twenty per cent., while present prices net over twice that profit.
